

Your Pathway to a Health Career Exercise

Compare your high school courses that you have taken so far in high school with the admission requirements for post secondary health professions training programs of your choice.

Materials

You will need the admission requirements for the college or program of your choice. Remember to include general admission requirements and any additional requirements for health career programs.

Exercise Directions

List the courses you have taken so far in high school. Then compare your courses with admission requirements of the college of your choice. Have you taken the courses so far that you need? Do you still have time to take a needed requirement or can you plan to take it perhaps in the summer?

Recommended high school courses in preparation for 4 Year Colleges and Universities

COURSES	-my High School courses so far-			
Recommended Path	Classes in Grade 9	Classes in Grade 10	Classes in Grade 11	Classes in Grade 12
English- 4 years				
Math- 3 years although 4 years highly recommended				
Laboratory Science- 2-3 years				
Social Studies- 3 years and 1 year of US History				
Foreign Language- 3 years of the <u>same</u> language				
Electives- 4 years select these courses wisely, based on what college suggests
