

The MUSC Alcohol and Brain Imaging Lab (ABIL) is conducting a research study that uses brain imaging to assess people who drink alcohol. Participants must be between 25 and 35 years of age. The study requires 2 visits and will include a 1-hour MRI scan. Compensation is available for those who qualify. This study does not involve alcohol treatment. For more information, call Lindsay at (843) 608-8037 or email abilab.musc@gmail.com
