Based on the research overview provided by the investigator, please summarize the following information in 1-2 pages from a statistical consulting perspective:

1) **Provide an overview and summary, including pertinent comments regarding:**
   - Research Objectives and Hypotheses (note: translate into statistical questions)
   - Endpoints:
   - Sample Size/Power
   - Study Design:
   - Subjects and Recruitment:
   - Data Collection Methods:
   - Data Analysis Plans/Issues:
   - General Statistical Recommendations:

2) **What 3 questions would you like to ask this investigator to serve his/her consulting needs?**

3) **What are some of the concerns or limitations this investigator should be aware of?**

4) **Identify any strengths/weaknesses to the approaches taken by investigator or to our recommendations.**
